18 MR. ZELCH: My name is Glennon Zelch. I'm a  
19 retired civil engineer. I live in Pioche, Nevada and  
20 I'm interested in what the financial compensation is  
21 going to be to the State of Nevada for being the  
22 landfill for the world's nuclear fuel.

23 MR. LUPTON: And when we take your statement  
24 here, I can't engage during the taking of your  
25 statement, so please proceed.

0011

1 MR. ZELCH: Okay. I'm not opposed to Yucca  
2 Mountain, but I want to be sure that the citizens of  
3 Nevada derive some benefit for their potential risk and  
4 loss of potentially usable real estate of the state, and  
5 for that there has to be some compensation, and I'm  
6 interested in what that's going to be and how -- you  
7 know, how it will be handled.

8 So that's all I have to say.
